

Greetings to Start Publication of Dokkyo Medical Journal

Takuya Yazawa, MD, PhD

Chairperson of Dokkyo Medical Society, Administration Committee

We have just published a new Journal, Dokkyo Medical Journal (DKMJ). Our office, Dokkyo Medical Society, is located at Mibu, Tochigi, Japan where modern medicine in Japan was born during the Edo period. Therefore, we feel honored that DKMJ has been published in Mibu and hope that DKMJ significantly contributes in further development of medical sciences.

DKMJ publishes not only original papers but also reports, short communications, and review articles in the areas of medical science and its related fields. We welcome submissions of articles describing valuable information in clinical medical science, basic medical science, social medical science, and co-medical science from all over the world.
