

Table 2 The eRAP calculated by IVC diameter with its respirophasic variation

IVC diameter	Collapse	eRAP
$\leq 21$ mm	$\geq 50\%$	3 mmHg
$\leq 21$ mm	$< 50\%$	8 mmHg
$> 21$ mm	$\geq 50\%$	8 mmHg
$> 21$ mm	$< 50\%$	15 mmHg

eRAP, estimated right atrial pressure; IVC, inferior vena cava
