

Table 2: Predictors of recurrent bleeding from logistic regression in multivariate analysis

	Odds ratio	95%CI	P-value
Shock on admission	5.118	1.168-22.429	0.030
Blood transfusion	1.678	0.478-5.860	0.420
Hyperlipidemia	3.022	0.937-9.746	0.064
Active bleeding on first colonoscopy	3.157	0.700-14.247	0.135

CI, confidence interval
